

The Butler County Water and Sewer Department will be performing another phase of water main flushing beginning on October 5, 2015. Hydrant flushing is necessary to enhance water quality and reduce the occurrence of taste or odor issues.

While the water will remain safe throughout the flushing process, water may become discolored (red) or milky looking as a result of the high velocities achieved during the flushing process.

More information can be found on our website at [www.butlercountyws.org](http://www.butlercountyws.org) or by calling the flushing hotline 24 hours a day at (513) 887-3969.

The flushing schedule is as follows:
