Re: New Regulations

Please be advised that the new regulations ANSI-NSF-372 regarding the lead content for drinking water system components will begin to be enforced on January 1, 2013. This new regulation requires that all drinking water system components which come in contact with the water must be certified as being manufactured with no lead. This will include all corporation stops, curb stops, and fittings in the meter pit.

Please contact Tim McQueen at 785-5168 or me at 887-5699 if you have any questions.

Sincerely,

**BUTLER COUNTY WATER AND SEWER DEPARTMENT**

Martha A. Shelby, P. E.  
Engineering and Construction Manager
